

Interactive Flood Mapping Tool

Wellington Shire Council has developed an online Interactive Flood Mapping Tool that enables you to obtain a free map/report that contains flood information specific to your property, outlining the changes proposed as part of Planning Scheme Amendment C125well.

Flood information is useful for:

- Residents/businesses wanting to understand risk and prepare for future floods
- People looking to buy or rent a property
- Property owners looking to renovate their house or build an extension
- Developers looking to subdivide a property
- Farmers looking to undertake works on their property or develop a whole farm plan.

How to use the Interactive Flood Mapping Tool

1. Type in your address in the 'type to search' field:

Search area to type an address or locality into. Press the magnifying tool to search.

2. Alternatively, if you don't know the address, click on the map and scroll to zoom in to an area to find a property manually
3. In the layers menu select the tick box to display the 'existing' flood overlays, and/or the 'proposed' flood overlays on the land

You can select one or both options to view what existing flood overlays (if any) are on a property and compare against the proposed.

4. When the property is selected, the results will be displayed, alongside the ability to 'print map', which provides you with a downloadable PDF copy of the proposed changes on your property.

Note: The map may take a few minutes to generate.

5. There is also the option to view/download the relevant flood studies which informed the proposed changes to the land.

Click the button to show the link/s for the relevant flood study to then download.

Further questions?

Do you have questions about the proposed changes? The Amendment C125well website contains a comprehensive suite of resources to address queries, along with a portal to request additional information, alternatively you can arrange to speak to a Strategic Planner.
